

The scale bar diagram illustrates two horizontal distance scales. The top scale, labeled 'Nautical Miles', shows a range from 1 to 5. It features a series of small tick marks at each integer mile, with a single horizontal line segment spanning the distance between mile 0 and mile 1. The bottom scale, labeled 'Yards', shows a range from 1000 to 8000. It includes major tick marks at 1000, 2000, 4000, 6000, and 8000, with corresponding horizontal line segments indicating the distance for each mark.

TIDAL INFORMATION				
PLACE	Height referred to datum of soundings (MLLW)			
NAME	(LAT/LONG)	Mean Higher High Water	Mean High Water	Mean Low Water
Newport Bay Ent.	(33°36'N/117°53'W)	feet 5.4	feet 4.7	feet 0.9
Catalina Harbor	(33°26'N/118°30'W)		5.2	4.5
Los Angeles	(33°43'N/118°16'W)		5.5	4.8

Dashes (- - -) located in datum columns indicate unavailable datum values for a tide station. Real-time water levels, tide predictions, and tidal current predictions are available on the Internet from <http://tidesandcurrents.noaa.gov>.

To ensure that this chart was printed at the proper scale, the line below should measure six inches (152 millimeters).

This chart was distributed as a PDF (Portable Document Format). Printing PDFs may alter the chart scale, color, or legibility that may impact suitability for navigation. Printed charts provided by NOAA certified Print on Demand (POD) providers fulfill a vessel's requirement to carry a navigational chart "published by the National Ocean Service" in accordance with federal regulations, including but not limited to 33 C.F.R. 164.33(a), 33 C.F.R. 164.72(b), and 46 C.F.R. 28.225(a). POD charts meet stringent print standards and can be recognized by an official certification of authenticity printed on the chart. A list of POD providers can be found at: nauticalcharts.noaa.gov/pod
